

# AQUAFILTER

## from the safe water trust

a charity helping to provide safe drinking water for people in developing countries

AQUAFILTER  
FAMILY

*“The teacher was thrilled with the results and now teachers in other schools are asking how they can get a pump for their school. **At last I have found the best avenue for providing clean water for the children.** Some of the churches that I work through do not have the reality of their children drinking dirty water as they personally can afford bottled water. The school teachers however see and have to deal with the effects of bad water on a daily basis with children missing school or being ill at school. The schools and clinics will be the places where we will locate the pumps first in 2012.”*

- Jennifer, Children of Honduras Trust

## Could you help?

- with this or other projects, please sponsor an Aquafilter
- many other ways you can get involved, please contact us
- make it your school charity project?
